# I Wear My Patent Leather BURROJAPS

## To Work

"Why?"

"Because I can do my best when I feel my best---and a man feels his best when he looks his best.

"BURROJAPS Patent Leather does not heat the feet, nor 'draw' them---is every bit as pliable as the softest kid shoe---every bit as comfortable.

"Aren't patent leathers rather expensive footwear for every day wear, did I hear you say? No, at least, not BURROJAPS. Better wearing soles were never put under a shoe than those used in BURROJAPS, and the patent leather uppers are guaranteed to outwear the soles. That's a guarantee you can't get other shoe manufacturers to make on even kid and calf skin shoes."

# For Dress, I Wear the Same BURROJAPS

## That I Wear to Work

"Yes, this snappy pair of 'pats' I'm wearing this evening are my office shoes also. Look mighty nifty, don't they? No breaks across the tops---in fact, no breaks anywhere---to all appearances a new pair of shoes---dress shoes in the fullest sense of the word.

"That's the advantage of patent leather shoes---they don't even need a shine---look like new all the time---or until the patent leather breaks through; and, as I said before, BURROJAPS patent leather is guaranteed to outwear the soles. If it does happen to break through, 'what's the odds'---Berberich's guarantee to replace them with a new pair absolutely free. Such a guarantee is your assurance of shoe serviceability."
